Subject: TPH Fraction PRG

Hi Kristine and Elizabeth,

We are writing up a memo and will have it out first thing in the morning. (b) (6) but is back in the office this afternoon.

The short story is that the TPH fraction data from GASCO riverbank wells shows HQs > than 100 for higher molecular weight aromatic fractions. The highest HQ for a fraction is 400. Again, this will go out to you Thursday morning.
